FOR IMMEDIATE RELEASE: July 6, 2015

Cornerstone Hospital Medical Center - Early Adopter of Telemedicine Program

Houston, Texas - Cornerstone Hospital Medical Center (“CHMC”), recently partnered with iDoc Telehealth Solutions to implement a state of the art Telemedicine Intensive Care Unit (“Tele-ICU”) Program. As a healthcare provider located in the world’s largest Medical Center, Cornerstone is dedicated to providing the highest quality of care to the communities it serves. With the addition of Tele-ICU, Cornerstone will provide high acuity and critical care services not available in any other Long Term Acute Care (“LTAC”) hospital in the region. This strengthens the hospital’s commitment and ability to provide its patients with the level of care that is expected from the community.

Cornerstone Hospital Medical Center provides care for patients with complex medical problems requiring individualized, interdisciplinary acute care. With 24/7 critical care rounding capabilities to assist in the interpretation and transformation of data, iDoc TeleHealth services compliment the work of the physicians and clinical professionals that treat patients at CHMC by supporting the timely identification, intervention and treatment of patients experiencing a medical urgency before they require resuscitation. This proactive approach to managing patient care is aligned with the current level of high quality patient outcomes that exist at Cornerstone Hospital Medical Center.

Today, top academic medical centers and leading hospital systems across North America use Telemedicine for greater access to specialists and to offer healthcare services to larger patient populations. iDoc physicians will actively monitor patients utilizing one of the only FDA-cleared Class II Telemedicine technology, InTouch’s RP-Vita, a state-of-the-art robot with auto drive autonomous navigation. This robot is affectionately known to the staff as “Bentley”. Physicians can easily connect via PC, iPad or smart phones for clinical consults in less than a minute with unrivaled access to supporting clinical documentation, patient data and medical imaging. This allows them to conduct highly reliable, real-time, remote consults with patients and other healthcare providers using secure Provider Access Software.

FDA and HIPAA compliance allows Bentley to be utilized in pre-operative, peri-operative, post-surgical, psychological and critical care assessments and examinations. Equipped with an electronic stethoscope, Bentley has the ability to also connect with other diagnostic devices such as otoscopes and ultrasounds that provides a new level of ease of use and independence that frees doctors and nurses to focus solely on patient care and forget the technology.

About Cornerstone Hospital Medical Center

Cornerstone Hospital Medical Center, an affiliate of Cornerstone Healthcare Group, is a 35 bed licensed Long-Term Acute Care Hospital with CIHQ accreditation and 16 licensed Intensive Care Unit beds. The hospital is designed to bridge the continuum of care and is intended to facilitate the achievement of individualized, functional goals for medically complex patients. This business philosophy guides the medical programs providing services for pulmonary, wound care management, medically complex patients and medical with rehabilitation. The programs are designed to complement the continuum of care provided by traditional hospitals, skilled nursing units, home health and rehabilitation hospitals. In the continued effort in providing personalized care to its patients and their families, Cornerstone Hospital Medical Center will be the first location within the Cornerstone Healthcare Group to implement a Tele-ICU program. About Cornerstone Healthcare Group

Cornerstone Healthcare Group is a Dallas-based provider of complex acute and post-acute care services owned by funds managed by Highland Capital Management, L.P. Cornerstone operates nineteen Long Term Acute Care Hospitals in Texas, Oklahoma, Louisiana, Arkansas, Arizona and West Virginia. Cornerstone provides care to patients in need of a longer hospital stay due to multiple, complex medical conditions requiring specialized and intense care. Treatment may start at a short-term acute care hospital and then continue at a Cornerstone hospital. Cornerstone's hospitals provide care for patients with complex respiratory issues, including ventilation weaning, advanced wounds requiring specialized treatment, and medically complex patients requiring intensive nursing care due to multi-system failure. Our knowledgeable staff cares for each patient with compassion and respect. Our mission is to provide the highest quality, patient-focused healthcare and customer service to every patient, family member, and physician we serve. Visit www.chghospitals.com.

About iDoc Telehealth Solutions

iDoc Telehealth Solutions is a telemedicine physician services company, dedicated to providing high-quality telemedicine services for physicians, hospitals and other healthcare organizations. Through close collaborations between doctors, nursing staff and healthcare administrators, iDoc improves the patient experience and enhances the overall quality of care. With newer technologies making telemedicine delivery easier and more cost-effective, iDoc is able to provide on-demand access to care while improving patient care and satisfaction. iDoc's team of physicians includes highly skilled specialists, many of who were trained at some of the most prestigious medical institutions in the world. iDoc Telehealth Solutions provides patient evaluations, secondary medical opinions, acute stroke consultations, mental health assessments, critical care rounding, acute inpatient care, and more. Visit www.idoctelehealth.com.

About InTouch Health

InTouch Health provides technology-enabled services to healthcare organizations for the delivery of high quality virtual care, anytime, anywhere. InTouch Health has helped more than 110 healthcare systems deploy Telehealth programs across their enterprise, and into other sites of care, quickly and seamlessly using its industry-leading combination of professionals, processes and practices. The InTouch Telehealth Network provides users unmatched ease of use and diagnostic capabilities, proven reliability, FDA and HIPAA compliance, secure access control, and clinical and technical reporting.

Meet "Bentley"

Through our continued effort in providing personalized care to our patients and their families, Cornerstone Hospital Medical Center is proud to be the first and only LTAC in Houston to implement a Tele-ICU program. On Thursday, July 23, 2015, from 4:00pm to 7:00pm, Cornerstone Hospital Medical Center will host an interactive reveal where you will have the opportunity to meet Bentley first hand. Tours will be available along with the opportunity to meet the doctors of iDoc and special guest appearances. To schedule a tour, please contact Kim Garner at kgarner@chghospitals.com.
